DATE MAILED: 05/13/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application N . 10/038,507	Applicant(s) HOPKINS ET AL. <i>ES</i>	
	Examiner James M Hewitt	Art Unit 3679	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 February 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12, 14, 15, 17 and 21-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12, 14, 15, 17 and 21-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Claim Objections

Claims 1-8 are objected to because of the following informalities:

gh In claim 1 line 2, "providing a seal" should be replaced with "a seal provided".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1, 9 and 17 recite the

broad recitation "the linear cross-sectional profile being angled between 40 and 68 degrees from the coupling axis" and claims 3, 14 and 22 respectively also recite "wherein the linear cross-sectional profile is angled between 50 and 59 degrees from the coupling axis" which is the narrower statement of the range/limitation.

Claims 17 and 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 17 lines 2-3, the phrase "of a like metallic material" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed, thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

In claim 17 lines 5-6, "the tapered mouth" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 26 is rejected under 35 U.S.C. 102(b) as being anticipated by Hashimoto (US 5,172,939).

Referring to Figures 1-4, Hashimoto discloses a method for forming a fluid-tight seal in an ultrahigh pressure fluid containment system, without the need for a gasket or other insert, the method comprising: providing a first component (1) having a first

longitudinal bore (3) and a first tapered engagement portion (3') with a linear cross-sectional profile (conical; see col. 3 lines 3-16) that is symmetrical about a first longitudinal axis; providing a second component (5) having a second longitudinal axis (X) and a second tapered engagement portion (18) with a curved cross-sectional profile that is symmetrical about a second longitudinal axis; and abutting the first component against the second component with their longitudinal axes aligned and their tapered engagement portions in contact with each other, such that the contacting surfaces between the components is circular, and urging the first and second components against each other.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12, 14-15, 17 and 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashimoto (US 5,172,939).

Hashimoto discloses a metallic fitting (5) for sealing a fluid at a pressure greater than or equal to 15,000 p.s.i. in a vessel (1) of a like metallic material, without requiring a gasket therebetween, the vessel having a tapered mouth for engaging the fitting along a coupling axis, the fitting comprising: a tapered engagement portion (18) shaped to sealingly contact the tapered mouth in a circular seal, the engagement portion having a

convex, curved (elliptical or arcuate) cross-sectional profile, the tapered mouth having a linear cross-sectional profile (conical).

Hashimoto discloses the claimed invention except that the linear cross-sectional profile (or tangential contact angle) ranges from 40-68 degrees (or 50-59 degrees) from the coupling axis. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ said range in Hashimoto, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill. *In re Aller*, 105 USPQ 233.

Hashimoto discloses the claimed invention except that the linear cross-sectional profile (or tangential contact angle) is 54 degrees from the coupling axis. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ said range in Hashimoto, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

It should be noted that Hashimoto defines the curvature radius of the bearing surface (18) within a range of 0.4D and 10D (see col. 3 lines 31-42), wherein D is the diameter of the branch pipe. Hashimoto thus contemplates and finds import in the angle of contact between the fitting (5) and vessel (1).

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Refer to the above rejections.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kato, Sugino et al and Mott et al constitute prior art devices considered by the Examiner to be relevant to the claimed invention(s).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M Hewitt whose telephone number is 703-305-0552. The examiner can normally be reached on M-F, 930am-600pm.

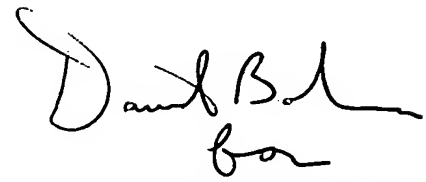

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne Browne can be reached on 703-308-1159. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9326 for regular communications and 703-872-9327 for After Final communications.

Application/Control Number: 10/038,507
Art Unit: 3679
